

Protecting Young Agents from Hate Speech with AI-Driven Support

Erasmus+

Co-funded by the Erasmus+ Programme of the European Union

Problematic

Between 6.8 and 8.5 million young people worldwide work as customer service agents, yet 76% of Gen Z employees report experiencing aggression from clients, far higher than older generations. This exposes a large portion of the youth workforce to daily verbal abuse, stress, and mental strain

Client aggression in customer service

Solution

SafeSpace AI is a dual-AI platform that detects hate speech across communication channels while protecting agent privacy. It instantly flags incidents to managers and provides automated coaching tools to ensure ethical, proactive leadership and agent wellness support.

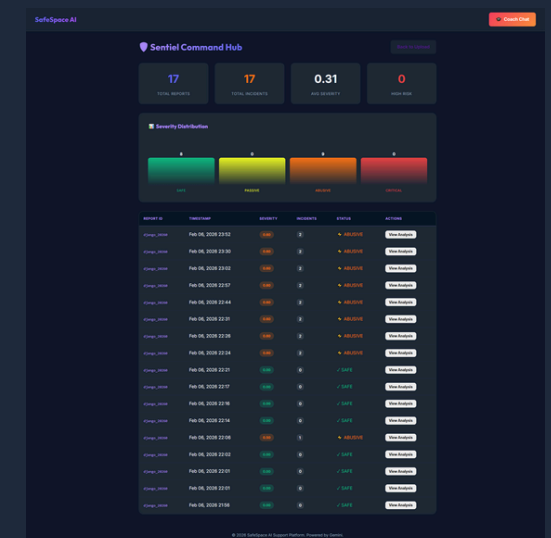

SafeSpace AI

Gen AI Usage

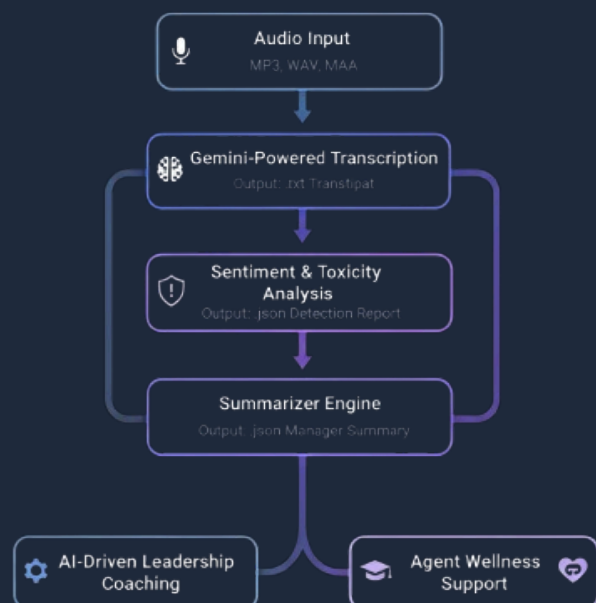

- Detects and classifies hate speech across channels
- Generates anonymized incident reports
- Powers agent emotional support chatbot
- Guides managers through advisory AI coaching
- Ensures privacy through censored outputs

Manager Dashboard

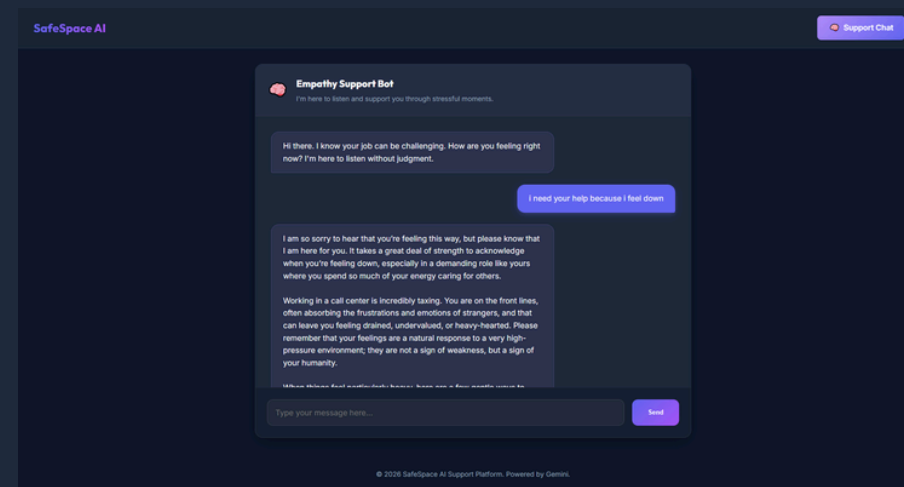

Shows daily exposure of all agents to hate speech with Severity scores and categories

Project Pipeline
